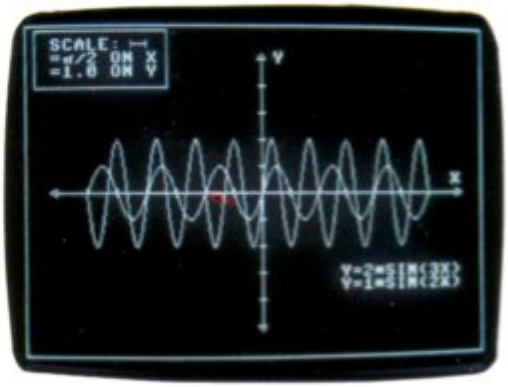
LOGO a language for learning



LOGO is a powerful computer language. It helps people of all ages develop clear thinking skills. It also teaches the fundamentals of programming that are used in any structured language.

And LOGO is fun . . . for everyone. A pre-schooler can draw shapes using one letter commands. An older child or adult can use LOGO graphics to draw simple shapes and complex pictures. The mathematical capabilities of the PLUS/4 and LOGO combine to do simple or complex computations. Thus, LOGO is a learning tool that both teaches and can be used to create other learning tools.

FEATURES OF THIS COMMODORE PLUS/4 PACKAGE:

- The manual is a step by step tutorial that teaches how to use LOGO.
- The LOGO language is easy to use for the novice and challenging for the expert.
- This LOGO uses the full graphics, color and music capabilities of the Commodore PLUS/4 computer.
- LOGO for the PLUS/4 is cartridge based and also includes a Utilities Disk.
